Shallow geothermal energy: a valid and substantial aid to energy saving for a building totally independent of fossil sources in Europe ENGLISH LANGUAGE SESSION

Language: Italian
Simultaneous translation: English

Organized by: CNR - ISAC

The "shallow geothermal energy also called low enthalpy", uses the energy present in the subsoil up to about 100m deep from where it is possible to extract heat "constantly" (unlike all other sources) during the winter season and to give it up during the summer season.

This workshop deals with modern technologies that allow you to transform the thermal energy present in the ground into heat that can be used for other purposes (for example heating or cooling a house) resulting in absolute the "cleanest" form of alternative and renewable energy, available anywhere and installable in any type of land. The most recent innovative methodologies have been studied and developed in recent European Projects, in particular GEO4CIVHIC- <http://www.geo4civhic.eu> and Cheap-GSHPs- <http://cheap-gshp.eu> whose results are the subject of the Workshop.

Section Chair

Adriana Bernardi, Research Director – National Research Council - ISAC

Programme

Introduction and welcome

Adriana Bernardi, CNR ISAC -Italy

The geothermal in Europe (EGEC-ETIP)

Adele Manzella, CNR

Low enthalpy geothermal and recent European projects. Innovations and progress: Cheap-GSHPs and GEO4CIVHIC

Adriana Bernardi, CNR ISAC - Italy

Solutions to support the preliminary assessment of the technical-economic feasibility of closed-loop geothermal systems

Antonio Galgaro, Università di Padova/University of Padova- Italy

Innovative coaxial heat exchangers". Some examples of application

Luc Pockelé & Giulia Mezzasalma, RED srl - Italy

An innovative technology for the installation of geothermal probes

Arno Romanowski, Terra-infrastructure GMBH –Germany

Environmental considerations of innovative shallow geothermal technologies

Riccardo Pasquali, GEOSERV srl –Ireland

Technique and plant engineering for restructuring using geothermal (pros/cons and solutions)

Michele De Carli, University of Padova – Italy

Development of Innovative Ground-Source Heat Pumps in the context of European projects

Fabio Poletto, Hiref - Italy

Is it possible to apply geothermal to historic buildings? Example of best practice

Francesca Bampa, UNESCO

Discussion and Closure

Adriana Bernardi, CNR ISAC -Italy

Offshore: evolution of the NTG, feasibility studies and commissioning of a wind farm

Language: Italian

Organized by: Hitachi Energy Italy SpA

In the last year the Italian market has proved to be very receptive to decarbonization objectives set by the European Union, showing great potential and strong will from investors, with more than 280 GW of new High Voltage (HV) connection requests received from Terna, of which 35% (99 GW) of Offshore Wind. Connection requests differ significantly from the FF55 reference scenario, both in terms of technology mix and specific quantities, which were forecast to be 70 GW by 2030, of which 12% (9 GW) from Offshore Wind.

An undoubtedly challenging scenario in which the main players, experts in different sectors, will have the opportunity to collaborate, through their own know-how, right from the initial stages in the development of projects, to optimize technical solutions, timing, and costs.

The industrial sector will find itself facing the growing demand for new products and solutions, with a still complex situation in the supply chain; while the Transmission Systems Operator is redefining its development strategy, in accordance with a much more dynamic market than expected.

In our conference we will focus on the main innovations and challenges of the offshore, starting from the development of floaters (Fincantieri), to get to the latest updated regarding the evolution of the National Transmission Grid (Terna), passing through the electrification of offshore wind farms and their connections to the high voltage grid (Hitachi Energy), aimed at preparing and supporting the country during the energy transition.

Programme

Welcome

Flavio Villa, Country Manager, Hitachi Energy

The development of floaters for substations and WTG

Giovanni Cobau, Head of Technical Support FPSO and account manager for special projects

Gianni Scherl, Chief Designer Offshore Business Unit's, Fincantieri

From feasibility study to commissioning: offshore AC solutions for bottom-fixed, floating and subsea applications

Ilario Scian, Global Product Manager Transformers, Hitachi Energy

HVDC for offshore application

Arman Derviskadic, HVDC Sales Manager Italy, Hitachi Energy

The future of National Transmission Grid in Italy: evolution and impacts on RES

Enrico Maria Carlini, Grid Planning, Interconnections and Permitting Director - Terna

Huawei FusionSolar Forum ITALIAN LANGUAGE VERSION

Language: Italian

Simultaneous translation: English

Organized by: Huawei

Registration link:

https://community.solar.huawei.com/it/offline_detail.html?detailId=5

Accelerating the energy transition is not only a must-have for all of us, but also an extraordinary opportunity to build a future for the new generations and a model of sustainable economic growth. To meet this challenge we must join forces, encouraging the adoption of innovative models and investing in the know-how and skills of professionals.

For this reason, together with institutional representatives and industry experts, we will deepen market trends and the latest regulatory innovations and, like Huawei, we will present our solutions and best practices for the Residential, Commercial and Industrial segments.

Digitalization, Photovoltaics, Storage, Self-consumption and Energy Communities will be the key words that will guide this transition, at the heart of the "**Huawei FusionSolar Forum**".

Programme

Welcome coffee and enrollement

2:00 p.m. **Opening:** *Huawei FusionSolar for a "Zero Emission" society*

Photovoltaics: the evolving scenario and new trends

Huawei FusionSolar: the 2023 novelties in Residential and Commercial sectors

2:45 p.m. **Round Table:** *From self-consumption to Renewable Energy Communities*

Huawei FusionSolar: Customer Service & Community

Award ceremony of "FusionSolar Rising Stars"

South Africa and Italy: joint projects towards the Just Energy Transition

Language: English

Organized by: Andersen in Italy

In 2023, investments in the field of clean energy are expected to reach an absolute record. More than 80% of the global economy has committed to take concrete steps towards carbon neutrality and the development of new technologies is reaching a decisive crossroad, where they will either be produced on a large scale or they will not meet expectations.

Africa is set to overtake the average global economy growth rate, with forecasts of about 4% in 2023 and 2024. A young and dynamic population that needs to win the challenge of the Just Transition towards cleaner and more accessible energy sources. South Africa needs to install at least 50GW of generation capacity to reach energy security. This scenario offers vast opportunities for cooperation between South African and Italian companies.

Programme

Introduction and welcome

Moderator: Alberto Magnani, Il Sole 24 Ore

First Round of questions (institutional):

14:05 ***How is South Africa facing the Just Energy Transition?***

H.E. Nosipho N.J. Jezile, Ambassador of South Africa in Italy

14:15 ***How does Italy support Italian companies looking at operations in South Africa and the African continent in this field?***

14:25 ***What are the immediate opportunities in South Africa's Green Energy Sector?***

Rethabile Melamu, CEO, South African Photovoltaic Industry Association

14:35 ***What is the goal of the Bridge Africa-Europe cooperation initiative?***

Francesco Marconi, International Contact Partner and Desk Coordinator, Andersen in Italy

Second Round of questions (business):

14:45 ***What are the technologies for decarbonization?***

Michele Ferrazzini, CEO Engineering Services for Energy

14:50 ***What does a manufacturer look for when investing?***

Troy Travlos, Africa Business Development, H2 Energy

14:55 ***Introduction of the African delegation***

Marcella Uttaro, Operations, Andersen in Italy
